Please Join Us for the HPV VACCINATION POLICY WEBINAR SERIES

The Tri-Networks (Geographic Health Equity Alliance, *Nuestras Voces* Network, and SelfMade Health Network) will host a series of live webinars for National Comprehensive Cancer Control Programs and Coalitions focused on opportunities to advance cancer-related strategies and improve health equity through PSE change. Over the course of three webinars, participants will learn how to operationalize PSE change, the importance of PSE change in improving health equity, the parameters for engaging in policy activities for staff at public agencies, how HPV vaccination can serve as a starting point for implementing PSE activities, and more.

The Tri-Networks are part of the CDC consortium of national networks implementing population-specific and public health-oriented strategies, for the prevention of commercial tobacco use and cancer in populations experiencing tobacco and cancer-related health disparities.
